Introduction

This document provides high-level steps to execute the setups and process flows for the use cases discussed in the Inventory Management implementation workshop. It is intended for the workshop participants only and is not meant to be consumed independently.

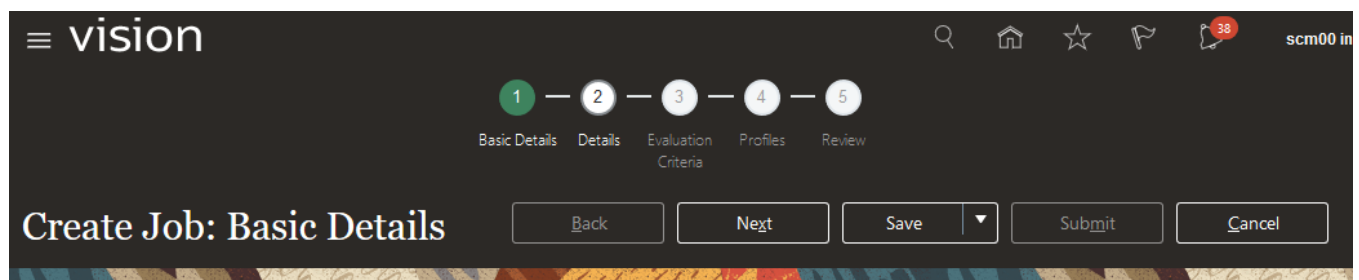

1. SCM Cloud and Inventory Overview

Security Overview

Creating a new user, assigning roles and provisioning data access.

Process/Transaction Flow:

1. Navigate to Setup and Maintenance > Search > Manage Job
2. Click the Create icon to create a new job. Enter Basic Details:

Basic Details ?

*Effective Start Date	1/1/51	*Name	SCM Workshop Participant 001
*Job Set	Common Set	*Code	SCMWP001
Action Reason			

3. Click on Next. The Job Details page is displayed.
4. Click on Submit. Click on Done.
5. Navigate to Setup and Maintenance > Search > Manage HCM Role Provisioning Rules
6. Click the '+' icon to create a new Role Mapping:

12. Click on Save and Close. Click on Done.

13. Click on the Navigator and go to Tools > Security Console > Users > Search for the user

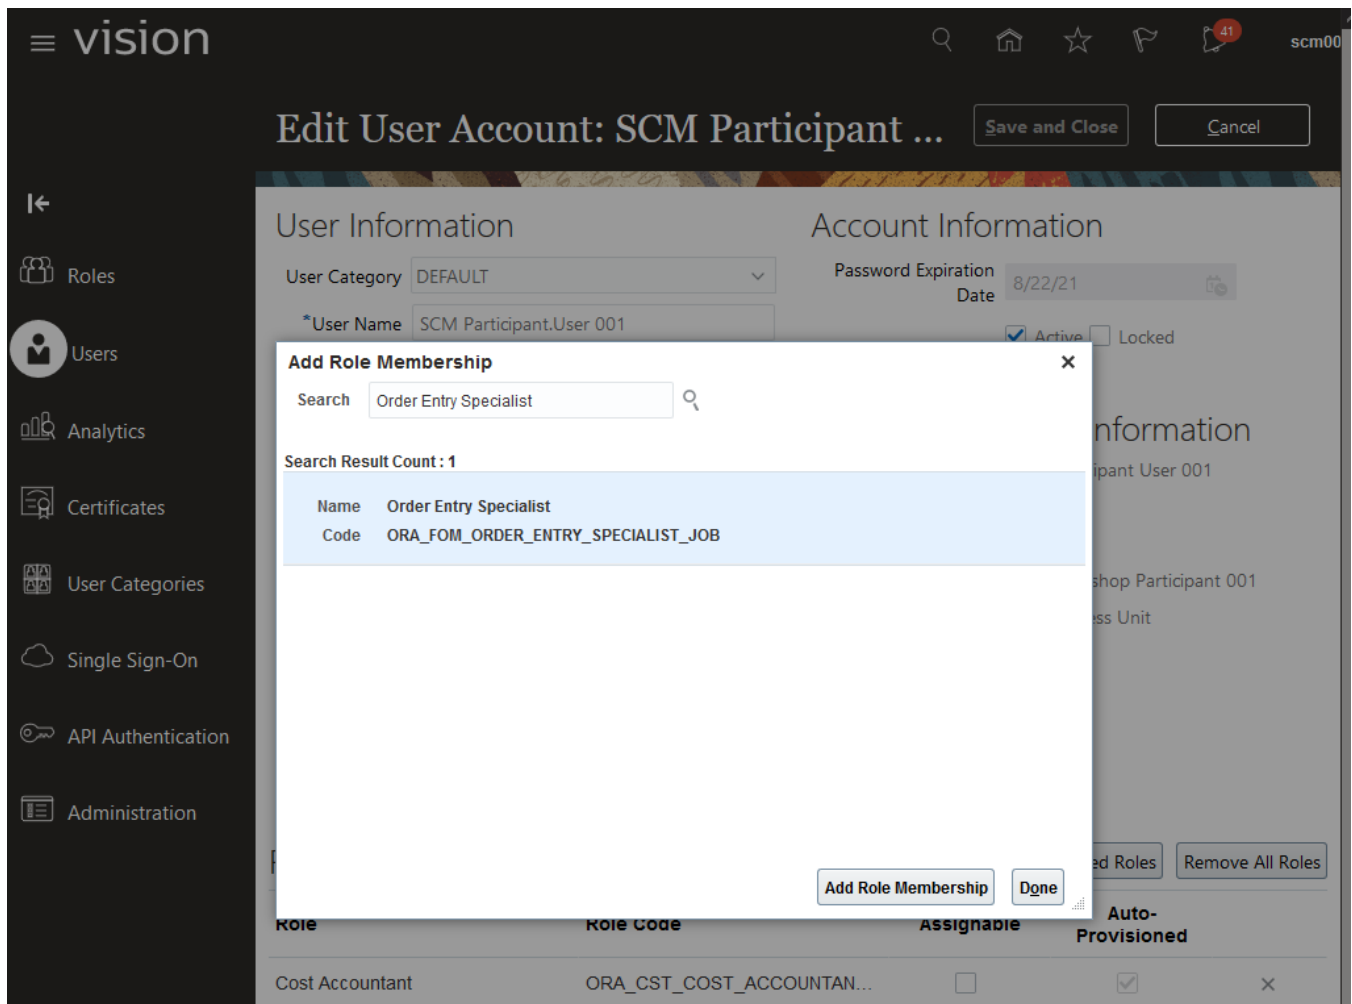

14. Click on the user to open the User Account Details page. Click on Reset Password:

15. Once the password has been reset, click on the Edit button. The Edit User Account page is displayed.

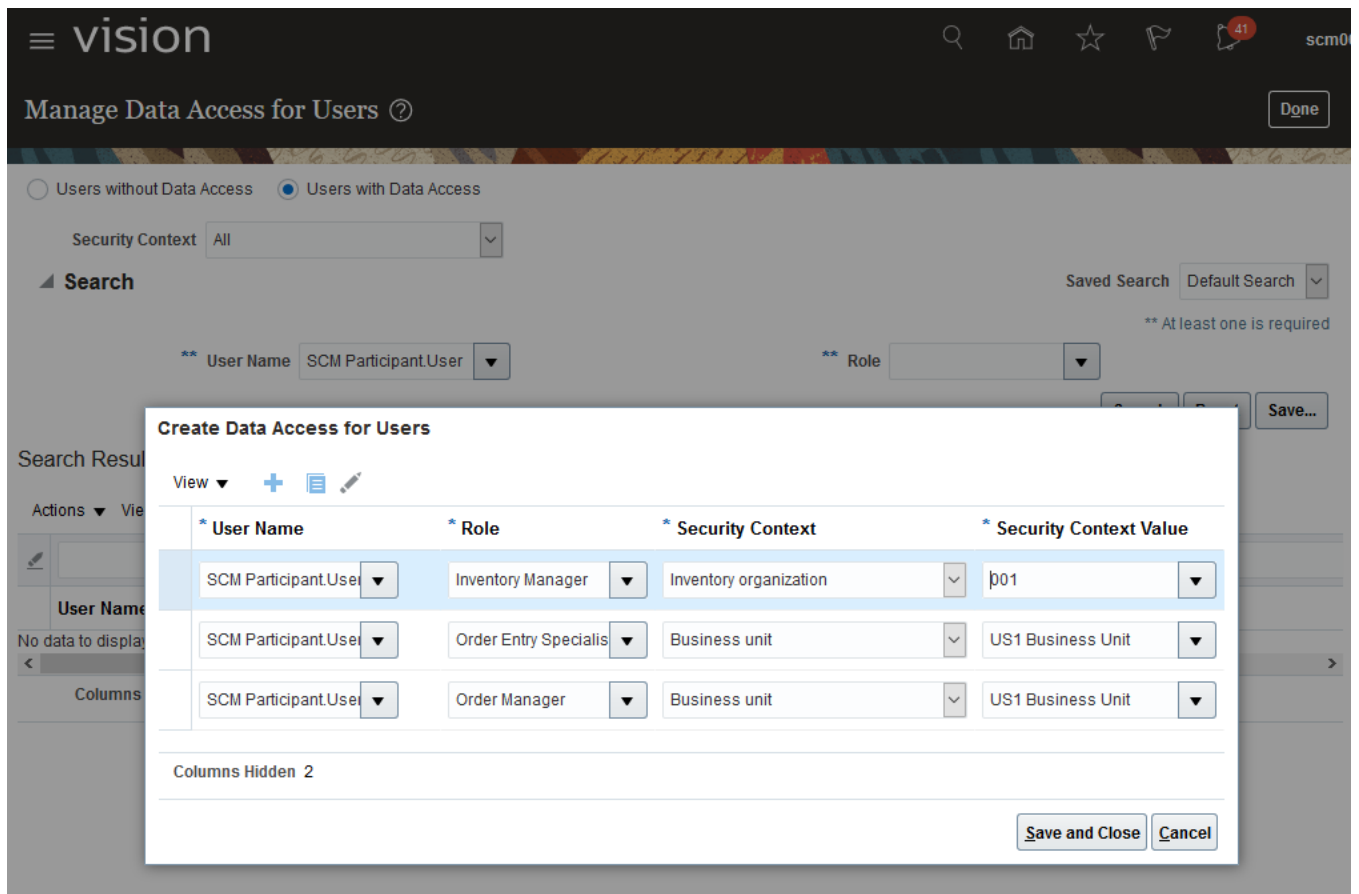

16. Click on Add Role and select the Order Entry Specialist role:

17. Click on Add Role Membership. Click on Save and Close. Click on Done.
18. Navigate to Setup and Maintenance > Search > Manage Data Access for Users
19. Click the '+' icon to Create Data Access for the newly created user:

20. Click on Save and Close. Click on Done.

21. Logout and login. Verify that the newly created user has access to the assigned Business Unit and Inventory Organization.

2. Building Blocks of Supply Chain Management

Review Item Organization

Review the existing Item Organization and verify the parameters set.

Process/Transaction Flow:

1. Navigate to Setup and Maintenance > Product Management > Item Organizations > Manage Item Organizations

(Note that the Task can also be accessed through other Functional areas)

2. Do a generic search and click on “000”. Click the Edit icon.

Organization	Organization Name
000	Operations
996	External Item Organization for PSFT1
997	External Item Organization for SAP1
998	External Item Organization for EBS1
999	External Item Organization for LEG2

3. Review the Basic Information:

Note that the Management BU and LE are optional for Item Organizations.

Edit Item Organization: Operations

Manage Extensibility: Create Item Class

Create a new Item Class, so subsequently this can be used to create an EFF. Optionally EFF can also be created under an existing Item class.

Process/Transaction Flow:

1. Navigate to Setup and Maintenance > Product Management > Items > Manage Item Classes
2. Click the + icon and add a new record. Provide the details as below and click Save and Close

The screenshot shows the 'Manage Item Classes' page. A modal window titled 'Create Item Class' is open, displaying the following fields:

- Parent Item Class:** Root Item Class
- * Item Class:** DEMO Computers
- * Internal Name:** DEMO_Computers
- * Description:** Computers
- Public:** ☐

At the bottom of the modal are three buttons: 'Save and Add Details', 'Save and Close', and 'Cancel'.

In the background, the 'Manage Item Classes' table is visible, showing a hierarchy of item classes:

Name	Description
Root Item Class	Root Item Class
Automotive	Automotive
Commerce Cloud	Commerce Cloud Items only

Manage Extensibility: Create Item EFF

Create a new EFF to capture the Processor Speed under the Item Class created earlier.

Process/Transaction Flow:

1. Navigate to Setup and Maintenance > Product Management > Items > Manage Item Attribute Groups and Attributes
2. Click the + icon

Manage Attribute Groups

Organization 001	999			Ea	
Organization 003	3		1	Ea	

3. Click on 'View Item Availability' to view the Available to Transact and Available to Reserve quantities:

The screenshot displays the Oracle Vision 'Manage Item Quantities' interface. A pop-up window titled 'Item Availability' is open, showing details for Item V21001. The pop-up includes fields for Item, Revision, Item Description, Lot, Organization, Source Subinventory, Locator, Inventory Project, and Inventory Task. Below these fields is a table showing quantity information.

Item Availability Pop-up Details:

- Item: V21001
- Revision: (blank)
- Item Description: Photo Paper Pack, 50 count
- Lot: (blank)
- Organization: 001
- Source Subinventory: (blank)
- Locator: (blank)
- Inventory Project: (blank)
- Inventory Task: (blank)

Quantity Table:

Quantity Type	Quantity				UOM Name
	On Hand	Receiving	Inbound	Total	
Total	999			999	Ea
Available to Tran...	999			999	Ea
Available to Res...	999			999	Ea

The background interface shows the 'Advanced Search' section with filters for Item, Organization, and Subinventory. The 'Search Results' section displays a list of organizations (002, 001, 003) under the item V21001. The 'View Item Quantity By' dropdown is set to 'Item'.

Manual Reservations

Create a manual reservation to block quantity for a critical customer.

Process/Transaction Flow:

1. Navigate to Supply Chain Execution > Inventory Management > Tasks > Manage Item Quantities
2. Review on hand situation of item AS65001 in the 001 Inventory Org:

The screenshot shows the 'Manage Item Quantities' interface with an 'Item Availability' pop-up window. The pop-up displays the following information:

- Item: AS65001
- Revision: (blank)
- Item Description: Portable Wireless Printer
- Lot: (blank)
- Organization: 001
- Source Subinventory: (blank)
- Locator: (blank)
- Inventory Project: (blank)
- Inventory Task: (blank)

The 'Item Availability' table shows the following data:

Quantity Type	Quantity				UOM
	On Hand	Receiving	Inbound	Total	
Total	54			54	Ea
Available to Transact	54			54	Ea
Available to Reserve	54			54	Ea

The interface also includes an 'Advanced Search' section with filters for Item, Organization, and Subinventory. The 'Search Results' section shows the item AS65001 and its organization 001. The 'Organization 001: Details' section is visible at the bottom.

3. Navigate to Supply Chain Execution > Inventory Management > Tasks > Manage Reservations and Picks

- Click on Create Reservations. Under the Demand section, click on Create > Create User-Defined Demand

Interorganization Transfer

Move material from one organization to another via an In-transit Shipment.

Process/Transaction Flow:

1. Review the on-hand quantity of item CM28287 in Inventory Org 001:

Manage Item Quantities ? Done

▶ Advanced Search Saved Search All Item Quantities ▾

Search Results ?

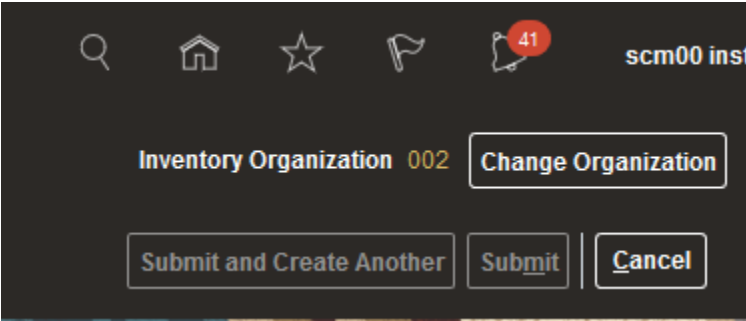

View Item Quantity By Item ▾

Actions View [Icons] View Item Availability

Item	Quantity				Secondary Quantity
	On Hand	Receiving	Inbound	UOM Name	On Har
Item CM28287 ☆	45			Ea	
▶ Organization 001	45			Ea	

2. Change Organization to 002 – this will be the Source Organization for the transaction:

3. Navigate to Supply Chain Execution > Inventory Management > Tasks > Create Interorganization Transfer

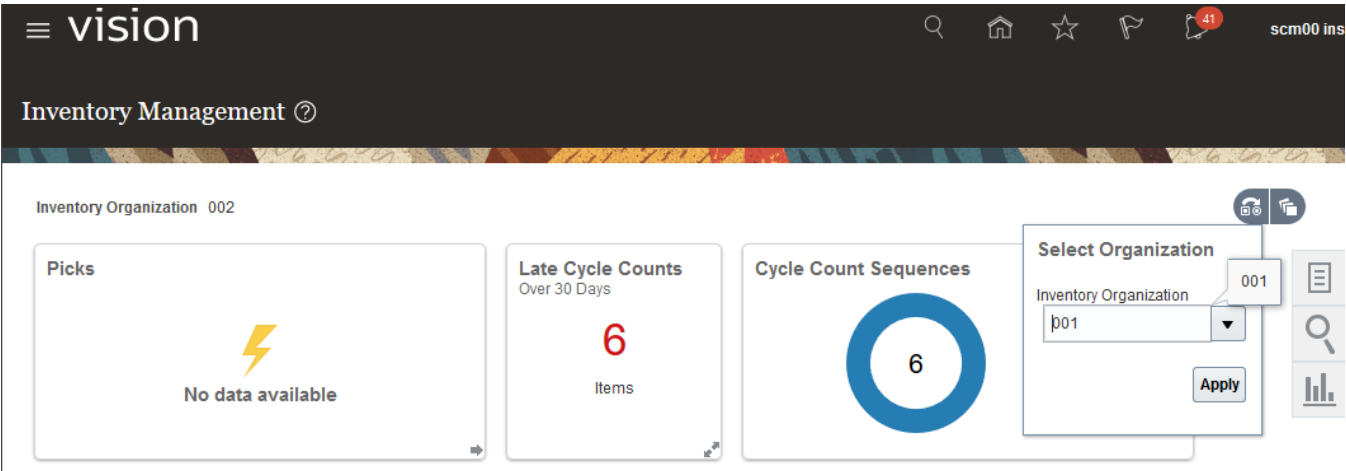

4. Select the Type = Intransit Shipment, click on Generate Shipment Number and enter the other details as illustrated in the screenshot below:

A screenshot of the 'vision' system interface for 'Create Interorganization Transfer'. The header bar includes the 'vision' logo, search, home, star, and flag icons, a notification bell with '41', and the text 'scm00 ins'. Below the header, the text 'Inventory Organization 002' is displayed in yellow, with a 'Change Organization' button to its right. Below this, there are three buttons: 'Submit and Create Another', 'Submit', and 'Cancel'. The main form area is titled 'Create Interorganization Transfer ?'. It contains several input fields: 'Date' (5/25/21 12:32 PM), 'Destination Organization' (001), 'Type' (Intransit Shipment), 'Shipment' (490630), 'Source' (empty), 'Waybill' (empty), 'Carrier' (empty), 'Number of Packing Units' (empty), and 'Expected Receipt Date' (5/25/21). There is a 'Generate Shipment Number' button and a checkbox for 'Enter transactions by serial numbers'. Below the form, there is a section titled 'Transaction Lines' with a table. The table has columns for 'Line', '* Item', 'Source' (with sub-columns for '* Subinventory' and 'Locator'), 'Destination' (with sub-columns for 'Subinventory' and 'Locator'), '* UOM Name', '* Quantity', and 'Reason'. The first row shows '1' in the 'Line' column, 'CM28287' in the '* Item' column, 'Stores' in the '* Subinventory' column, and '3' in the '* Quantity' column. Below the table, there is a section titled 'Line 1: Availability ?' with four sub-sections: 'Available Quantity 113 Ea', 'Secondary Available Quantity', 'On-Hand Quantity 113 Ea', and 'Secondary On-Hand Quantity'.

5. Click on Submit. A confirmation message is displayed.

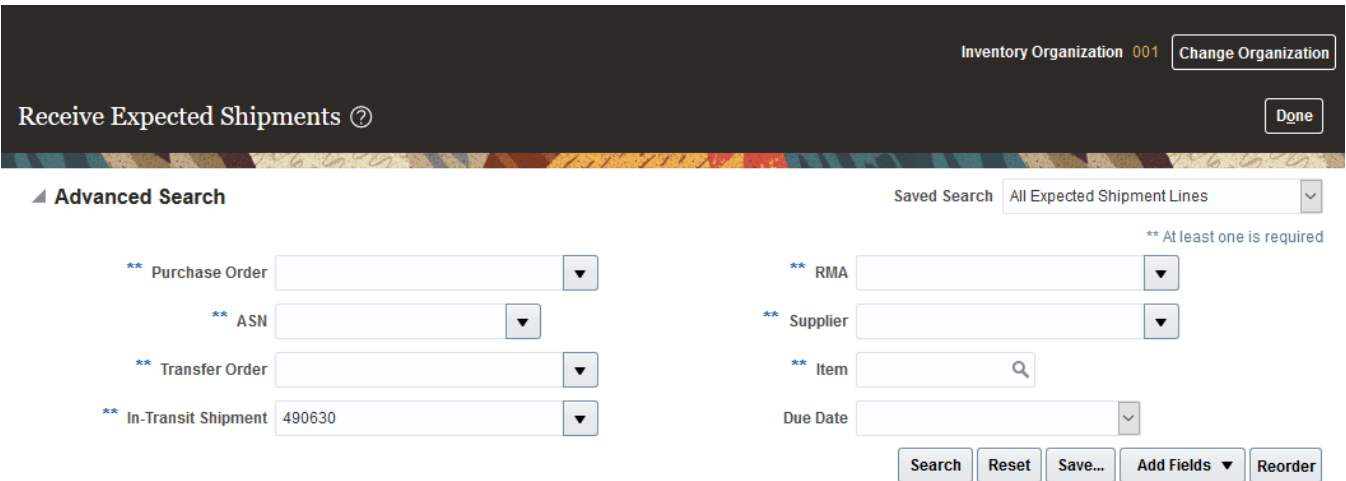

6. Change Organization to the Destination Organization 001

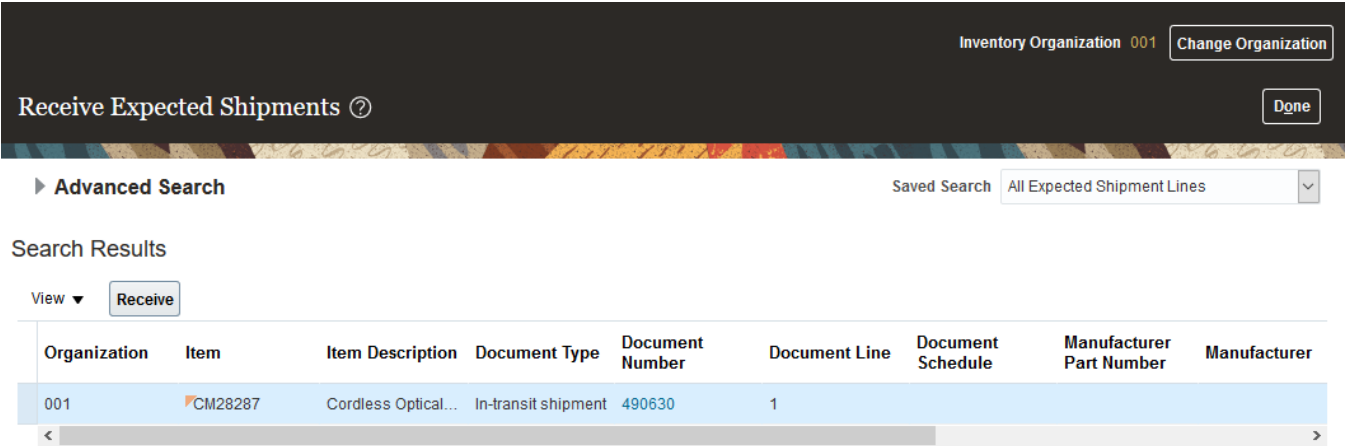

7. Navigate to Supply Chain Execution > Inventory Management > Tasks > Receipts > Receive Expected Shipments

8. Enter the In-Transit Shipment number and click Search:

9. Select the row and click Receive:

10. Enter the Receipt Quantity and click on Create Receipt:

6. Maintain Inventory Accuracy

Cycle Count – Perform ABC Classification

Vision wants to setup an automatic cycle count (CC) for Stores subinventory in one of their Organization. They want to use ABC Classification to group the items and want to setup different counts per class of items.

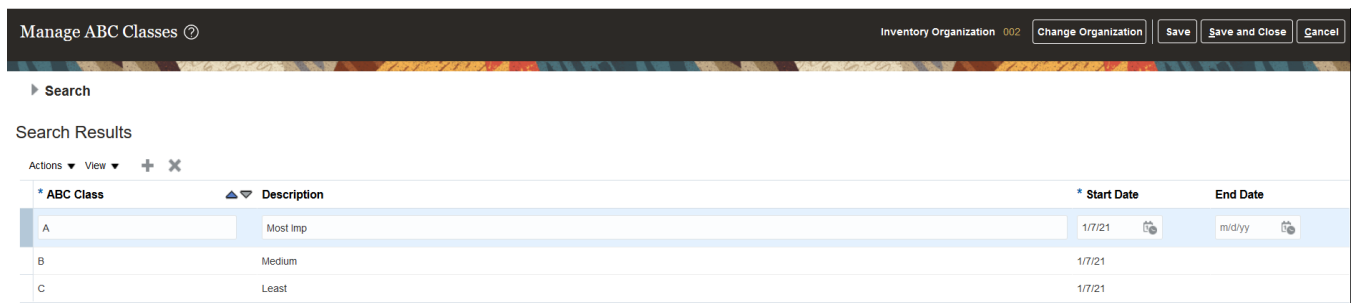

Requirements addressed:

- Use three classes A, B and C
- Use Onhand Quantity as a sort criteria at the Subinventory level
- Classify top 20% items as A, 40% items as B and remaining as C

Process/Transaction Flow:

Create ABC Classes

1. Navigate to Setup and Maintenance > Manufacturing and Supply Chain Materials Management > Inventory Management > Manage ABC Classes
2. Set the organization as 002.
3. Create the ABC classes as follows. Optionally you can add more classifications if needed. Here we have three – A, B , C

* ABC Class	Description	* Start Date	End Date
A	Most Imp	1/7/21	mid/yy
B	Medium	1/7/21	
C	Least	1/7/21	

Create ABC Classification Sets

4. Navigate to Setup and Maintenance > Manufacturing and Supply Chain Materials Management > Inventory Management > Manage ABC Classification Sets
5. Use the + icon to create a new Classification Set
6. Enter the details as below and click Submit. This spawns a ESS process.

Setup Cycle Count

Setup a Cycle Count.

Requirements addressed:

- Automatic Cycle Count setup using ABC classification.
- Count A class – 12 times a year, B class – 6 times a year and C class – once a year
- Approval with 5% tolerance

Process/Transaction Flow:

Create Cycle Count

1. Navigate to Supply Chain Execution > Inventory Management
2. Set the organization to 002
3. Use Create Cycle Count task
4. Provide a CC name and Include the Stores subinventory:

OK Cancel

21. Click on the Download data.

22. Enter the User credentials to connect to the instance.

23. The Search Window opens and enter the Recall number created (RN100025) and click on OK. The Recall Notice is fetched as shown below.

Change	Status	Recall Notice Number	Recall Line Number	Sequence Number	Item Number	Revision	Item Description	Manufacturer Part Number	Organization Code	Location Name
		RN100025	1		1 HP2001		CHG Prep Applicator		HC01	Wondercare General Ho.

24. Capture the Processing Mode Code as PROCESS. Enter the Count quantity, Secondary quantity (if any), Counted by Employee and click on Upload Changes.

The screenshot shows the Oracle Visual Builder interface. The top menu bar includes File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Help, and Oracle Visual Builder. Below the menu is a toolbar with icons for Download Data, Table Row Changes, Upload Changes, and Clear. A data table is displayed with columns: Change, Status, Recall Notice Number, Recall Line Number, Sequence Number, Item Number, Revision, Item Description, Manufacturer Part Number, Organization Code, and Location Name. The table contains one row with data: Change (2), Status (Update), Recall Notice Number (RN100025), Recall Line Number (1), Sequence Number (1), Item Number (HP2001), Revision (CHG Prep Applicator), Manufacturer Part Number (HC01), and Location Name (Wondercare General Ho.).

25. Observe that the Recall Notice is updated and Status changes to Update Succeeded.

The screenshot shows the Oracle Visual Builder interface with an 'Upload' dialog box open. The dialog box has a progress bar and a 'Cancel' button. A notification panel on the right side of the screen shows the following notifications: 'Notifications', 'Uploading changes...', 'Selected row status', and 'Pending update.' Below the dialog box, the data table is shown with the status updated to 'Update Succeeded'.

26. Check the Task – Perform Physical Count and Quarantine Recalled Parts. The Task Status is moved to Completed Status.

Task Name	Task Status	Inventory Organization	Location	Subinventory	Requester
Deliver Recalled Parts to Quarantine Location	Completed 11/16/23	HC01	-	-	-
Perform Physical Count and Quarantine Recalled Parts	Completed 11/16/23	HC01	Wondercare General Hospital	Stores	-

27. Now Login as the Inventory Manager to perform the Disposal of Recalled parts.

Navigate to Supply Chain Execution-> Inventory Management-> Receipts-> Manage Supplier Returns Without Receipt

Choose the appropriate Organization.
