Introduction

When Customer procure something and it arrives at customer's destination, during that from the supplier to the Inventory, it could accumulate charges while it is on the way.

Therefore, these charges could be Shipment, Duties, Carrier fees or Broker fees, etc...

Therefore, customer want to have the right evaluation and you want to capture all the additional expenses. One other part is to help customers with the profitability analysis and choosing the right supplier.

Once customer have that information captured in the system, they can do a lot of analysis and make many Decisions, Sourcing, Pricing, or final costing or profitability analysis.

We will start the flow with creating a PO for the material

Qty = 50 at Unit Price = \$2

Create Trade Operation

Procurement BU Vision Operations

Name Test TO

Description

Transaction Type PO receipt

Document Currency USD - US Dollar

Currency Conversion Rate Type Corporate

Route

Save and Close Cancel

Trade Operation by default will be in Draft Status, and system internally assign a sequence number.

Click the (+) icon to add landed cost charges

For simple Test Case, we will add only one charge “Freight”

For this “Freight” charge, you will need to provide Supplier Details , Charge Amount and Allocation Basis (This tells how the charge amount will be allocated on each Unit of the material PO Qty).

Amount = \$50, so landed cost expected to add up \$1 as Freight to the PO Unit Price (\$2 Material + \$1 Freight)

In addition, user need to add a Charge Reference with a value, this will be used to link this Trade Operation Charge to AP Invoice. Save and Close

Once you done, Click Action Menu at the Top of the Trade Operation and Select Update Status

Now, we will create the AP Invoice for the landed cost Charge 'Freight'

The Oracle Invoices dashboard shows various metrics and a sidebar with navigation options. The 'Invoices' sidebar is highlighted, showing options like 'Create Invoice', 'Create Invoice from Spreadsheet', 'Create Recurring Invoices', 'Manage Invoices', 'Apply Missing Conversion Rates', 'Validate Invoices', 'Initiate Approval Workflow', 'Import Invoices', and 'Correct Import Errors'. The main area displays a table of invoices with columns: Invoice Number, Amount, Supplier, Supplier Site, Validation Status, Invoice Date, Business Unit, Creation Date, Assignee, and Identifying PO. The table is currently empty, showing 'No data to display'.

In the Invoice Header, give same Supplier information as entered in the Trade Operation

Enter other required fields and Amount

The Oracle 'Create Invoice' form is shown. The 'Invoice Header' section includes fields for Identifying PO, Business Unit, Supplier (CV_SuppA01), Supplier Number (1011), Supplier Site (CVSuppA01Sba01), Legal Entity (Vision Operations), and Invoice Group (1234). The 'Invoice Actions' section has buttons for 'Save and Create Next', 'Save', 'Save and Close', and 'Cancel'. The 'Lines' section shows a table with columns: Number, Type, Amount, Distribution Set, Distribution Combination, Distribution Combination Description, Accounting Date, Prorate Across All Item Lines, Description, Reference 1, Reference 2, Source, and Appr. The first line is highlighted, showing a 'Manual invoice line entry' with an amount of 50.00 and a distribution set of 'Line Set QA'.

[illegible][illegible]

Validate Invoice

The screenshot shows the Oracle 'Create Invoice: LC-11' interface. The 'Invoice Header' section is visible, showing details like Business Unit (Vision Operations), Supplier (CV_SuppA01), and Amount (50.00). The 'Invoice Actions' menu is open, and the 'Validate' option is highlighted. The 'Invoice Summary' on the right shows the status as 'Not validated' and 'Required' for approval. The 'Lines' section at the bottom shows a single line item with an amount of 50.00.

Number	Type	Amount
1	Item	50.00

Because of Tax setup, Header amount had to be change to meet the total amount after tax

Therefore, Validation succeeded.

Approve Invoice

The screenshot shows the Oracle 'Create Invoice: LC-11' interface. The 'Invoice Header' section is visible, showing details like Business Unit (Vision Operations), Supplier (CV_SuppA01), and Amount (67.44). The 'Invoice Actions' menu is open, and the 'Approve' option is highlighted. The 'Invoice Summary' on the right shows the status as 'Validated' and 'Required' for approval. The 'Lines' section at the bottom shows a single line item with an amount of 67.44.

Number	Type	Amount
1	Item	67.44

Final Account and Post the Invoice
