Introduction

When Customer procure something and it arrives at customer's destination, during that from the supplier to the Inventory, it could accumulate charges while it is on the way.

Therefore, these charges could be Shipment, Duties, Carrier fees or Broker fees, etc...

Therefore, customer want to have the right evaluation and you want to capture all the additional expenses. One other part is to help customers with the profitability analysis and choosing the right supplier.

Once customer have that information captured in the system, they can do a lot of analysis and make many Decisions, Sourcing, Pricing, or final costing or profitability analysis.

We will start the flow with creating a PO for the material

Qty = 50 at Unit Price = \$2

Purchase Order: 1005997 ★ View PDF Actions Done

For simple Test Case, we will add only one charge “Freight”

For this “Freight” charge, you will need to provide Supplier Details , Charge Amount and Allocation Basis (This tells how the charge amount will be allocated on each Unit of the material PO Qty).

Amount = \$50, so landed cost expected to add up \$1 as Freight to the PO Unit Price (\$2 Material + \$1 Freight)

In addition, user need to add a Charge Reference with a value, this will be used to link this Trade Operation Charge to AP Invoice. Save and Close

To Review Distributions in Cost Accounting, we need to run the interface job:

‘Transfer Transactions from Inventory to Costing’.

This job will interface the inventory put way part of the receiving transactions to Cost Accounting Module

The screenshot shows the 'Process Details' dialog box in Oracle. The 'Name' field is 'Transfer Transactions from Inventory to Costing'. The 'Description' is 'Transfers inventory transactions from inventory...'. The 'Schedule' is 'As soon as possible'. The 'Cost Organization' dropdown is set to 'ZCST-Vision Ops'. The 'Submit' button is highlighted.

Make sure it is Succeeded

Now, we will create the AP Invoice for the landed cost Charge 'Freight'

The Oracle Invoices Dashboard shows various metrics and navigation options. The 'Invoices' section is highlighted in the top navigation bar. The dashboard includes several summary cards: 'Scanned' (0-7, 0-14, 15+), 'Recent' (24 hours, 1), 'Holds' (240 Validation, 122 Purchasing, 14 Other), 'Approval' (8 Pending, 96 Others, 149 Rejected), and 'Prepaid' (6-30, 8-31, 65-61+). The right sidebar contains a list of actions under 'Invoices', 'Accounting', 'Assets', and 'Payables Periods'. The 'Invoices' list includes 'Create Invoice' (highlighted), 'Create Invoice from Spreadsheet', 'Create Recurring Invoices', 'Manage Invoices', 'Apply Missing Conversion Rates', 'Validate Invoices', 'Initiate Approval Workflow', 'Import Invoices', and 'Correct Import Errors'.

In the Invoice Header, give same Supplier information as entered in the Trade Operation

Enter other required fields and Amount

The Oracle Create Invoice form is shown with the 'Invoice Header' section expanded. The 'Supplier' field is highlighted with a red box, showing 'CV_Supp01'. The 'Number' field is also highlighted with a red box, showing 'LC-11'. The 'Amount' field is highlighted with a red box, showing 'USD 50.00'. The 'Date' field is set to '02/01/18'. The 'Payment Terms' field is set to '45 Net (terms date + 45)'. The 'Terms Date' field is set to '02/01/18'. The 'Requester' field is empty. The 'Attachments' field is set to 'None'. The 'Note' field is empty. The 'Lines' section is expanded, showing a table with columns: Number, Type, Amount, Distribution Set, Distribution Combination, Distribution Combination Description, Accounting Date, Prorate Across All Item Lines, Description, Reference 1, Reference 2, Source, and Approval. The first line is highlighted with a red box, showing '1', 'Item', '50.00', 'Line Set QA', and 'Manual invoice line entry'.

Click on Landed Cost Tab, Check the Enable flag and click (+) to add charge reference.

The screenshot shows the Oracle 'Create Invoice' window. The 'Invoice Header' section contains fields for Identifying PO, Business Unit (Vision Operations), Supplier (CV_SuppA01), Supplier Number (1011), Supplier Site (CVSuppA01Site01), Legal Entity (Vision Operations), and Invoice Group (1234). The 'Number' is LC-11, 'Amount' is USD 50.00, and 'Date' is 02/01/18. The 'Payment Terms' are 45 Net (terms date + 45), 'Terms Date' is 02/01/18, and 'Requester' is empty. The 'Attachments' are None and 'Note' is empty. The 'Lines' section is active, showing a table with columns: Number, Type, Amount, Landed Cost, Inventory, Overlay Primary Balancing Segment, Overlay Account Segment, Overlay Cost Center Segment, Overlay, and Multiperiod Accounting. The 'Landed Cost' tab is selected, and the 'Enable' checkbox for line 1 is checked. A red arrow points to the '+' icon in the 'References' column for line 1.

Number	Type	Amount	Enable	References	Item	Item Description	Company	Account	Department	Distribution Combination	Start Date	End Date	Accrual Account
1	Item	50.00	☒	+									
2	Item		☐	+									
3	Item		☐	+									
4	Item		☐	+									
5	Item		☐	+									

Enter same value as entered in the Trade Operation

The screenshot shows the Oracle 'Create Invoice' window with the 'Charge References' dialog box open. The dialog box has a title 'Charge References : Number 1'. It contains a 'Charge Name' dropdown set to 'Freight'. Below it, there are fields for 'Reference Type' (Shipment_Ref), 'Description' (Shipment_Ref), and 'Predefine Value' (1). The 'Example format' is shown as 'P,###.###'. The 'OK' button is highlighted with a red box.

Reference Type	Description	Predefine Value
Shipment_Ref	Shipment_Ref	1

Validate Invoice

The screenshot shows the Oracle 'Create Invoice: LC-11' interface. The 'Invoice Header' tab is active, displaying fields for Identifying PO, Business Unit, Payment Business Unit, Supplier, Supplier Number, Supplier Site, Supplier Site Address, Legal Entity, First-Party Taxpayer ID, and Invoice Group. The 'Amount' field is set to 50.00. The 'Invoice Actions' menu is open, and the 'Validate' option is highlighted. The 'Invoice Summary' panel on the right shows the status as 'Not validated' and 'Required' for approval. The 'Lines' section at the bottom shows a single line with an amount of 50.00.

Because of Tax setup, Header amount had to be change to meet the total amount after tax

Therefore, Validation succeeded.

Approve Invoice

The screenshot shows the Oracle 'Create Invoice: LC-11' interface. The 'Invoice Header' tab is active, displaying fields for Identifying PO, Business Unit, Payment Business Unit, Supplier, Supplier Number, Supplier Site, Supplier Site Address, Legal Entity, First-Party Taxpayer ID, and Invoice Group. The 'Amount' field is set to 67.44. The 'Invoice Actions' menu is open, and the 'Approval' sub-menu is visible. The 'Force Approve' option is highlighted. The 'Invoice Summary' panel on the right shows the status as 'Validated' and 'Required' for approval. The 'Lines' section at the bottom shows a single line with an amount of 67.44.

Final Account and Post the Invoice

Overview

Create Receipt Accounting Distributions

Name: Create Receipt Accounting Distributions

Description: Creates distribution lines for purchase order r...

Schedule: As soon as possible

Submission Notes: Notify me when this process ends

Parameters

Bill to Business Unit: Vision Operations

Confirmation

Process 600229 was submitted.

OK

Review Receipt Accounting Distribution:

One more transaction type created: 'Landed Cost Adjustment for Receipt'

This because the extra amount in the AP invoice because of the added tax, this also appear as per unit tax in the Actual section of the trade operation.
