

Troubleshooting Guide For Invoice Approval Going to Error with Error Code:FUN-720XXX (Doc ID 2721163.1)

In this Document

[Purpose](#)

[Troubleshooting Steps](#)

[Issue 1: An error occurred during approval rules evaluation. \(FUN-720452\)](#)

[Issue 2: The rules defined under Rule Set ##### didn't return any results. \(FUN-720336\)](#)

[Issue 3: The supervisor or job level associated with the approval rule doesn't exist. \(FUN-720337\)](#)

APPLIES TO:

Oracle Fusion Payables Cloud Service - Version 11.12.1.0.0 and later
Information in this document applies to any platform.

PURPOSE

The Purpose of the document is to Troubleshoot the issues When an Invoice Approval going to an Error With Error code:FUN-720XXX

Further to explain, Invoice Created and initiated for approval but On searching invoice from Manage invoice page, Invoice approval status showing as rejected and received the error notification with error code:FUN-720XXX then follow the below troubleshooting steps for resolving these issues.

TROUBLESHOOTING STEPS

Issue 1: An error occurred during approval rules evaluation. (FUN-720452)

Error:

An error occurred during approval rules evaluation. (FUN-720452)

Cause Approval rules evaluation failed because either the stage, participant, or rule is inactive or the approval group doesn't have members.

Action Ensure that either the stage, participant, or rule is active or the approval group has members.

Error in Invoice TEST_INVOICE_NUM Approval

Details		Supplier or Party	
Assignee	[REDACTED]	Supplier or Party	[REDACTED]
From	[REDACTED]	Business Unit	[REDACTED]
Assigned Date	8/24/20 6:11 AM	Number	TEST_INVOICE_NUM
Expiration Date	8/31/20 6:11 AM	Invoice Date	8/24/20
Task Number	208482	Description	Testing
		Invoice Total	10,005.00 USD

Error

An error occurred during approval rules evaluation. (FUN-720452)

Cause Approval rules evaluation failed because either the stage, participant, or rule is inactive or the approval group doesn't have members.

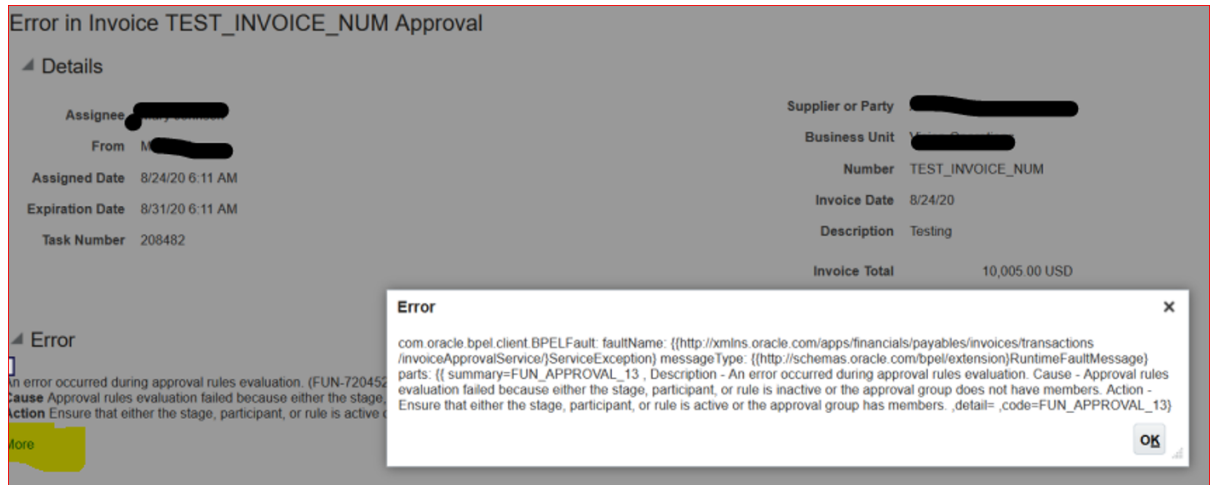

Action Ensure that either the stage, participant, or rule is active or the approval group has members.

[More](#)

On Clicking **More** button,below error can be seen

```
com.oracle.bpel.client.BPELFault: faultName:
{http://xmlns.oracle.com/apps/financials/payables/invoices/transactions/invoiceApprovalService/}ServiceExcept
messageType: {{http://schemas.oracle.com/bpel/extension}RuntimeFaultMessage} parts: {{
summary=FUN_APPROVAL_13 , Description - An error occurred during approval rules evaluation. Cause - Approval
```

rules evaluation failed because either the stage, participant, or rule is inactive or the approval group does not have members. Action - Ensure that either the stage, participant, or rule is active or the approval group has members. ,detail= ,code=FUN_APPROVAL_13}

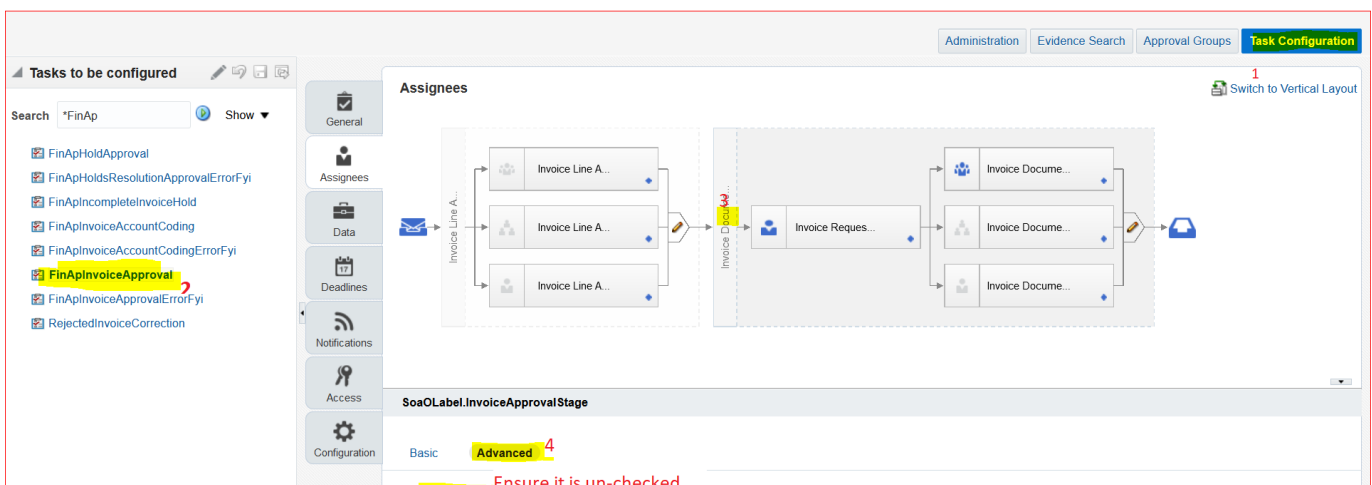

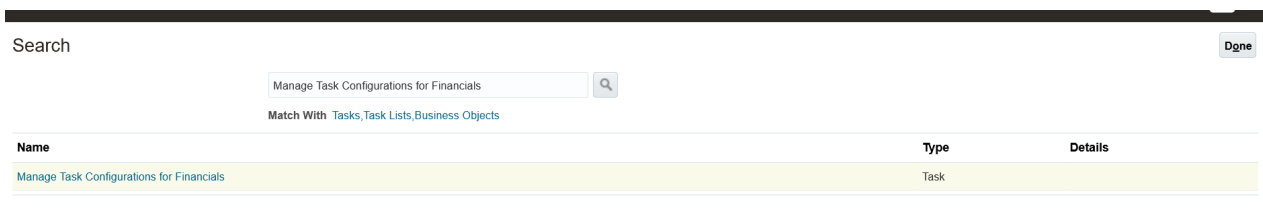

The possible causes for this error are given below:

1). When Stage is Inactive

Please check if the Stage is active or not? If stage is Inactive then make it Active by Unchecking Check Box for 'Ignore Stage' using navigation below

Navigation:

- Login with BPM Admin related user -> Go to the Setup and Maintenance
- Search for the setup task: Manage Task Configurations for Financials and Click on it
- It Open BPM Worklist Page-Task Configuration Tab
- Search for 'FinApInvoiceApproval' task under Tasks to be configured
- Click on the Assignee subtab
- Click on the InvoiceApprovalStage
- Go to Advanced Tab -> Uncheck the check for Ignore Stage
- Save and Commit

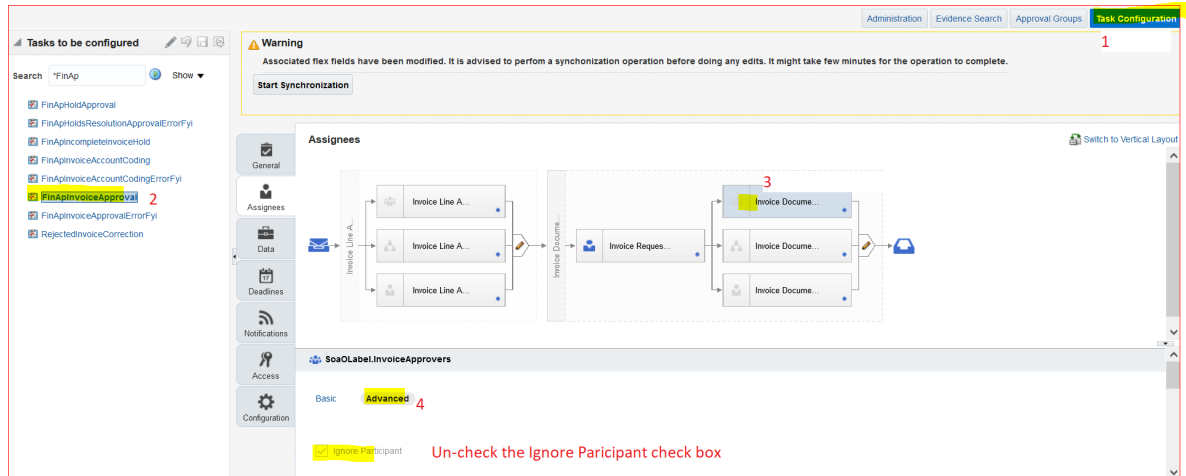

2). When Participant is Inactive

Please check if Participant is active or not? If Participant is inactive then make it active by Unchecking Check Box for 'Ignore Participant' using navigation below

Navigation:

- Login with BPM Admin related user -> Go to the Setup and Maintenance
- Search for the setup task: Manage Task Configurations for Financials and Click on it
- It Open BPM Worklist Page-Task Configuration Tab
- Search for 'FinApInvoiceApproval' task under Tasks to be configured
- Click on the Assignee subtab
- Click on the Participant: Invoice Document Approvers
- Go to Advanced Tab -> Uncheck the check for Ignore Participant

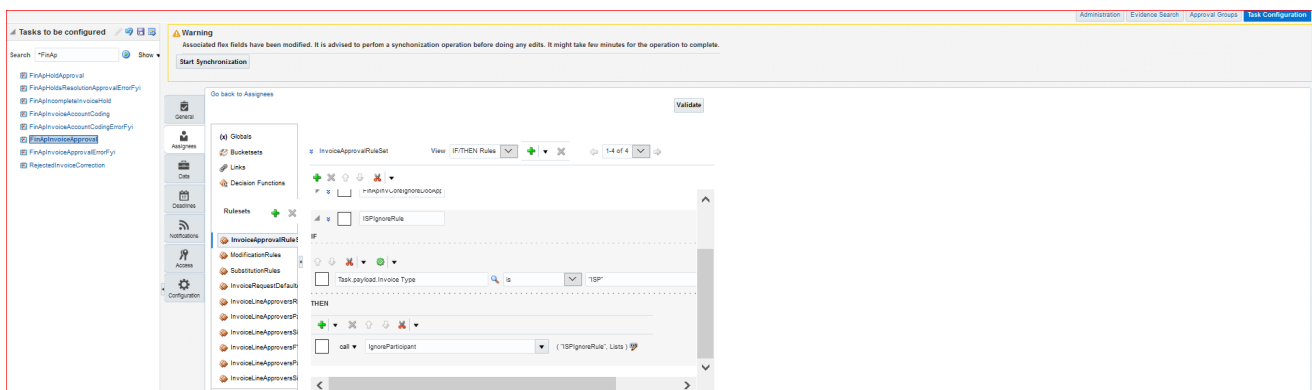

3). When Rule defined with IgnoreParticipant getting evaluated to true i.e. Ignoring Approval.

Check conditions inside 'IF Section' of the Rule with Ignore-Participant in the 'THEN Part' are getting evaluated to true? If yes, then modify the rule so that Rule with Ignore-Participant won't get invoked.

NOTE: The changes needs to done very carefully. If it is not done properly then it will have impact on other rules as well. Hence request to test all the scenarios before migrating to production.

Here is example for IgnoreParticipant

Issue 2: The rules defined under Rule Set ##### didn't return any results. (FUN-720336)

Error:

The rules defined under rule set <RuleSetName> didn't return any results. (FUN-720336)
Cause Probable causes includes a participant doesn't have any active rules, no matching rule exists, the rule definition is incorrect, or none of the rules evaluates to true.
Action Correct the rule definitions under the rule set.

Error in Invoice TEST_INVOICE_F1_V2 Approval Dismiss

```

NOTE: For custom participant/ RuleSet, Click on the More button to see the complete error details with RuleSet name having the issue.

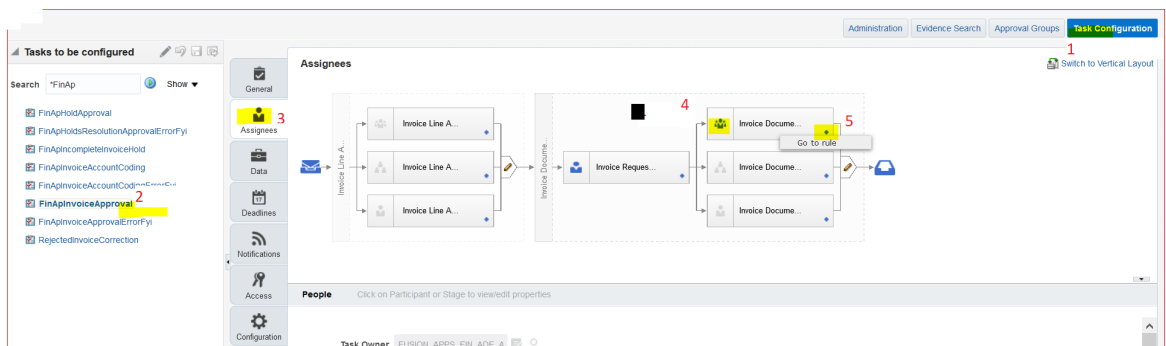

The possible causes for this error are given below:

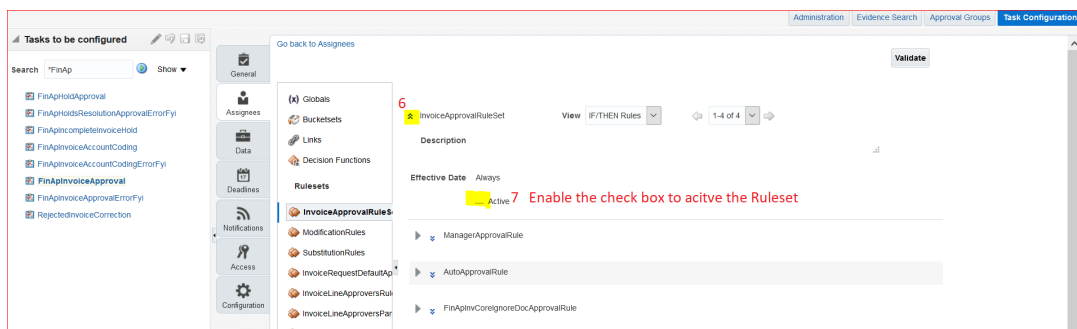

1). A particular RuleSet which was expected to be invoked was not Active

Please check the particular RuleSet which was expected to be invoked was not Active? If RuleSet is Inactive then make it Active by checking Active Check Box using navigation below

Navigation:

- Login with BPM Admin related user -> Go to the Setup and Maintenance
- Search for the setup task: Manage Task Configurations for Financials and Click on it
- It Open BPM Worklist Page-Task Configuration Tab
- Search for 'FinApInvoiceApproval' task under Tasks to be configured
- Click on the Assignee subtab
- Click on the respective Participant: (Invoice Document Approvers in this case)
- Click on small plus symbol(go to rule)
- Click on Show Advanced Settings(Down Arrow) for the RuleSet <RuleSetName>
- Active button should be checked to activate the RuleSet for approval to route correctly

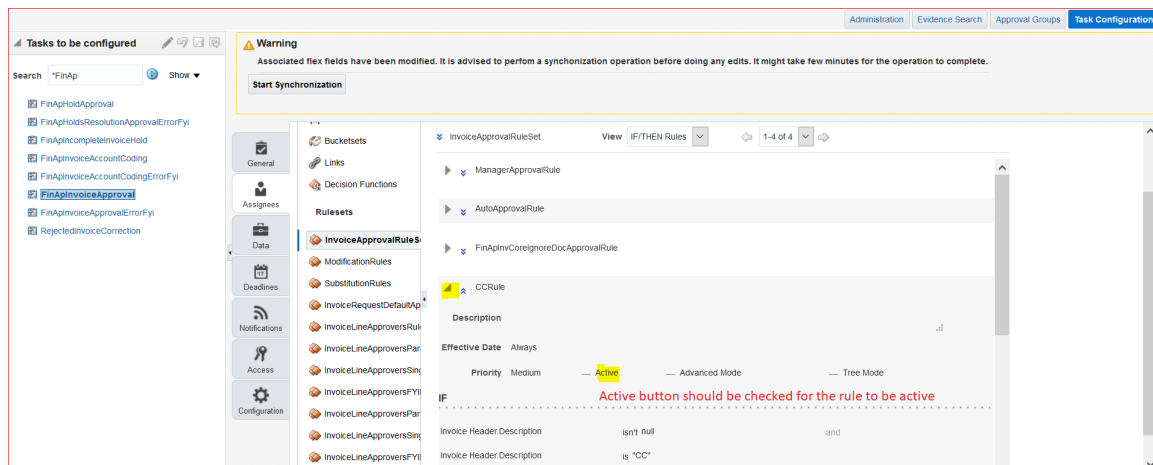

2). A particular Rule which was expected to be invoked under the RuleSet was not active

Please check the particular Rule which was expected to be invoked under the RuleSet was not active? If Rule is Inactive then make it Active by checking Active Check Box using navigation below

Navigation:

- Login with BPM Admin related user -> Go to the Setup and Maintenance
- Search for the setup task: Manage Task Configurations for Financials and Click on it
- It Open BPM Worklist Page-Task Configuration Tab
- Search for 'FinApInvoiceApproval' task under Tasks to be configured
- Click on the Assignee subtab
- Click on the respective Participant: (Invoice Document Approvers in this case)
- Click on small plus symbol(go to rule)
- Click on Show Advanced Settings(Down Arrow) for the Rule <RuleName>
- Active button should be checked to activate the Rule for approval to route correctly

3). None of the rules evaluates to true Under a particular RuleSet which was expected to be invoked

When Stage, Participant, RuleSet and Rule is active but the conditions is not matching inside the IF section of the approval rule which was expected to invoked then it will throw this error

Correct the rule definitions under the rule set to route the approval successfully.

As an example: Let us say, Approval rule defined with IF condition as

IF
 Invoice Header.Pay Group Lookup Code isn't null and
 Invoice Header.Pay Group Lookup Code is "Standard"
 THEN

But when an invoice created with different Pay Group (Assume: Domestic or null) and initiated for approval then conditions is not getting satisfied as per the approval rule setup then approval fail with this error.

To correct rule definition in this case, either need to change the condition for including the Pay Group which is missing in the Approval Rules or Otherwise change the Pay Group to Standard at Invoice level to route the approval correctly.

NOTE: The attributes which can be null, please ensure to add not null condition just before the actual condition inside the IF section of the approval rule as shown below.

PayGrpRule

IF

Invoice Header.Pay Group Lookup Code **isn't null** and

Invoice Header.Pay Group Lookup Code equals ignore case "Standard"

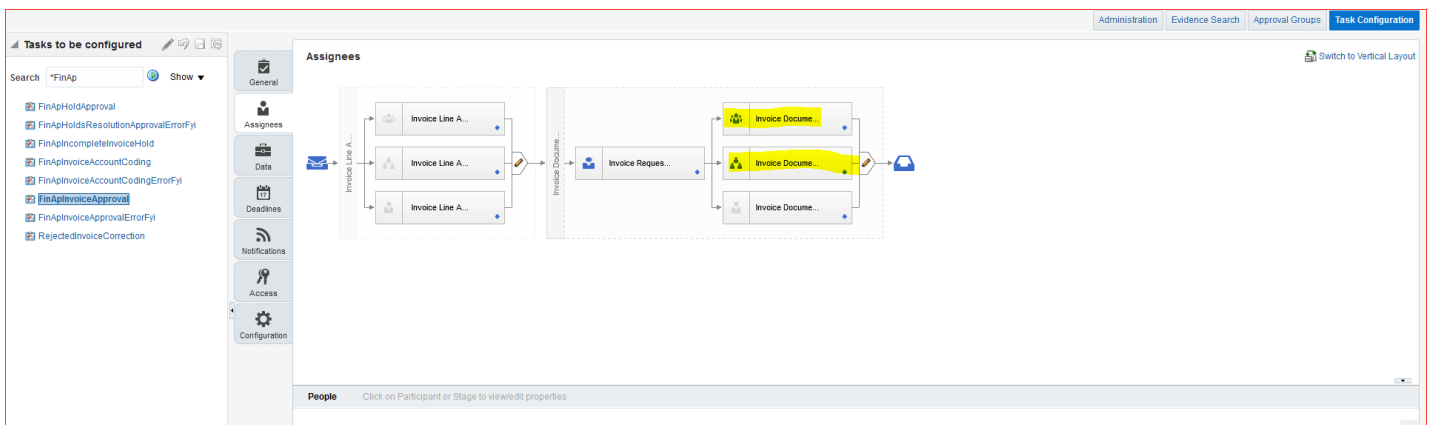

THEN

4). When any two RuleSets under two Participants(Serial\Parallel\Single) are enabled (as shown below) and the Rules under one of the RuleSet is getting evaluated to true but Other rule set is not getting evaluated to true(i.e There is No matching Rule or Catch Rule is defined for the Other RuleSet)

The Approval to route successfully, At-least One rule needs to get satisfied for each RuleSet.

If the approval required from one RuleSet(Ex: InvoiceApprovalRuleSet) but doesn't require (i.e. NOT case) from the Other Ruleset(Ex:ParallelTypeParticipantInParallelModeRuleSet) then define the rule with call the Ignore Participant in the Other RuleSet or Vice versa.

Example:

OK

The possible causes for this error are given below:

1). User selected in the Starting Participant of the List builder doesn't have Manager

Assign the Manager to route the approval successfully using the below navigation.

Navigation:

Navigation:Go Setup and Maintenance ->Setup: Financials ->Manage Users ->Search the Person ->select the Manager ->Save and Close

NOTE:Cost Center Manager's Manager assigned at Manage Departments Page

2). Dynamically derived Approvers/users are hard coded (with double quotes like static users) in the Starting Participant

Example:

```
HierarchyBuilder.getManager("supervisory","Invoice Header.Created By",-1,"","") or
```

```
HierarchyBuilder.getManager("supervisory","Cost Center Total.Cost Center Manager Name",-1,"","")
```

Need to remove the double quotes for Invoice Header.Created By/Cost Center Total.Cost Center Manager Name from Starting Participant to route the approval successfully

Validate

IF

Invoice Header Business Unit Name is "Vision Operations"

THEN

List Builder Supervisory

Response Type Required

Number of levels 1

Starting Participant HierarchyBuilder.getManager("supervisory","Invoice Header Created By",-1,"","")

Top Participant HierarchyBuilder.getPrincipal("finuser30",-1,"","")

Auto Action Enabled False

Auto Action null

Rule Name "BuleMatchingRule"

Dimension Id null

Double quotes added for Invoice Header.Created By at the starting Participant which is causing the approval fail with error. Needs to remove the doubles

From: HierarchyBuilder.getManager("supervisory","Invoice Header.Created By",-1,"","")

To: HierarchyBuilder.getManager("supervisory","Invoice Header.Created By",-1,"","")

3). Approval rules defined without adding Not Null conditions for attribute fields that can be null(i.e. Not Mandatory Fields) in few cases Or Using the functions like Starts with or Contains or toUpperCase() etc. on those non-mandatory attribute fields will throw this error(Even without using the Supervisory List builder also gives the same error).

Example of Not Mandatory Fields are: Invoice Header.Pay Group Lookup Code, Invoice Header.Pay Group Lookup Code, Invoice Header.Supplier Type, Invoice Header.Descriptive Flexfield Attribute1, Invoice Header.Base Amount, etc.

Need to Add the Not null condition before the actual condition to route the approval successfully.

Let us say, Approval rule defined as shown below

IF
Invoice Header.Pay Group Lookup Code equal ignore case "Standard"
THEN
Call Approval_Group

THEN

List Builder Approval Group

Response Type Required

Approval Group AP234

Allow empty groups False

Rule Name "BuleMatchingRule"

Dimension Id null

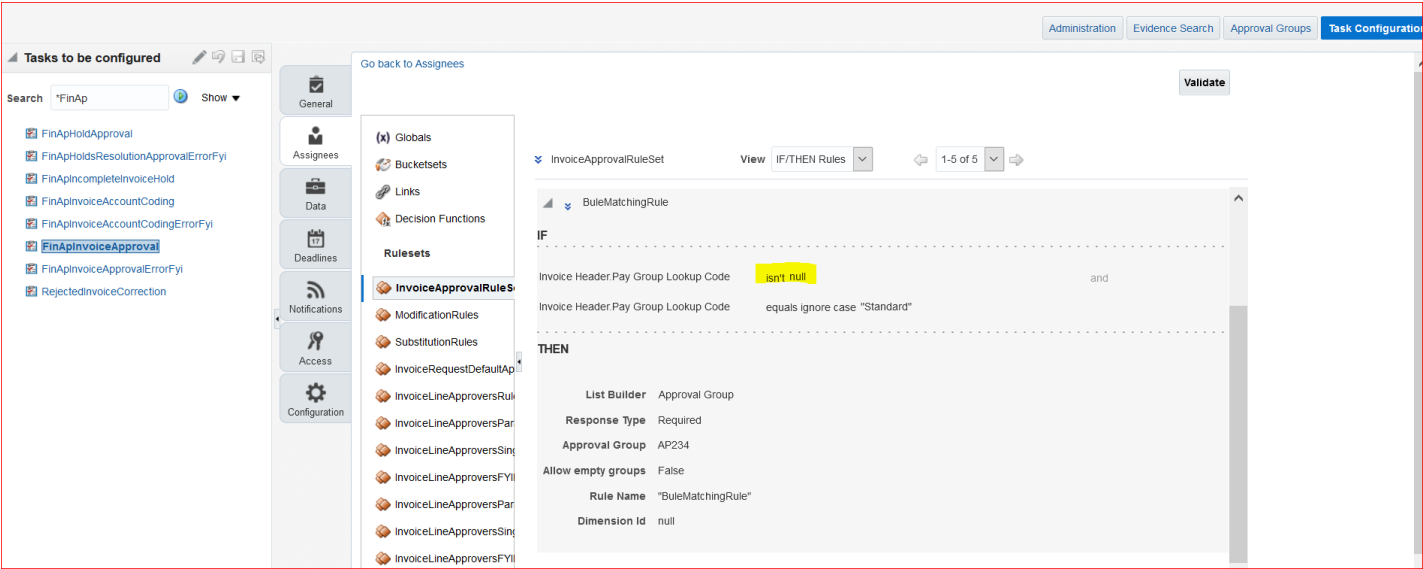

If any invoice created without adding the Pay Group and initiates for approval then invoice will get rejected and it will throw above mentioned error(FUN-720337)

To correct this rule,
Needs to add one more extra Not null check condition just before the actual condition(see the below)

IF

Invoice Header.Pay Group Lookup Code isn't null and
Invoice Header.Pay Group Lookup Code equals ignore case "Standard"

THEN

4. Currency conversion function used in defining the approval rules as per Doc ID 2020649.1 but exchange rate is NOT defined then it will throw above mentioned error(FUN-720337)

Need to define Currency Conversion Rate on the system for the From and To Currency for the particular date
