

EFF attributes in OTBI

This document describes how to setup Item Extended attributes (EFF) for OTBI reporting. It also shows using OTBI as source and downloading the report containing EFF attributes in PDF format.

Table of Contents

A. Setting up of EFF Attributes	2
B. Setting up of Item Class and add Attribute Group	7
C. Deploy Extensible Flex fields	10
D. Define Items	11
E. Run the scheduled Process for BI	12
F. Create OTBI report/Analysis.....	14
G. Export the OTBI report in PDF format	21

A. Setting up of EFF Attributes

- 1) Launch the setup task “Manage Extensible Flex Fields”; Search for Item Extended Attributes and click on Edit

Manage Extensible Flexfields DONE

7) Save all the data created.

B. Setting up of Item Class and add Attribute Group

- 1) Launch the setup task Manage Item Classes and click on Create to create a new Item class; Enter necessary values, Save and Add details

The screenshot shows the 'Manage Item Classes' window. At the top, there's a 'Search' section with filters for Item Class, Internal Name, and Description, all set to 'Starts with'. Below this are checkboxes for 'Item Creation Allowed', 'Item Versioning Enabled', 'New Item Request Enabled', and 'Name/Number Emboss'. The 'Search Results' section shows a list of item classes. A 'Create Item Class' dialog box is open in the foreground, allowing the user to define a new item class.

E. Run the scheduled Process for BI

- 1) Navigate to Scheduled Processes and click on “Schedule New Process”: Search for the Process “**Import Oracle Fusion Data Extensions for Transactional Business Intelligence**”; click on OK.

The screenshot shows the 'Scheduled Processes' application window. The 'Overview' tab is active, displaying search filters for Name, Process ID, Status, Submission Time, and Submission Notes. The 'Search Results' section shows 'View' options (Flat List, Hierarchy) and a list of processes. A 'Schedule New Process' dialog box is open, showing the process name 'Import Oracle Fusion Data Extensions for Transactional Business Intelligence' and its description: 'Imports extensible data, including data in descriptive flexfield segments, key flexfield segments, and General Ledger balances in Essbase cubes, into Oracle Transactional Business Intelligence.' The dialog has 'OK' and 'Cancel' buttons.
