

Example SQL To Show Item Image In BI Publisher (Doc ID 2257124.1)

In this Document

[Goal](#)[Solution](#)[References](#)

APPLIES TO:

Oracle Fusion Product Hub Cloud Service - Version 11.12.1.0.0 and later
Information in this document applies to any platform.

GOAL

Example SQL to generate a BI report that shows: Item Number, Item Description, and Item Image.

SOLUTION

The following query can be used to get the Item Number, Item Description, and Item Image for a BI (Business Intelligence) report:

```
SELECT ItemBasePEO.item_number,
ItemBasePEO.description,
ItemBasePEO.organization_id,
(SELECT (SELECT profile_option_value FROM fnd_profile_option_values WHERE profile_option_id IN
(SELECT profile_option_id FROM fnd_profile_options_vl where profile_option_name =
'EGP_UCM_URL'))||'/cs/idcplg'||'?IdcService=GET_FILE&dID='||(SELECT dm_version_number FROM
fnd_documents_vl WHERE document_id = (SELECT document_id FROM fnd_attached_documents WHERE
pk1_value = To_Char(ItemBasePEO.organization_id) AND pk2_value =
To_Char(ItemBasePEO.inventory_item_id) AND CATEGORY_NAME = 'IMAGE' AND ROWNUM = 1)) FROM dual) AS
IMAGE
FROM egp_system_items_vl ItemBasePEO
WHERE ItemBasePEO.inventory_item_id = :ItemId
AND ItemBasePEO.organization_id = :OrgId;
```

Note: The user has to setup the UCM host and port in the EGP_UCM_URL profile option for the above to work.

Steps for this action:

1. Login to the application - go into Setup and Maintenance
2. Search and open the task "Manage Administrator Profile Values"
3. Search for Profile Option Code: EGP_UCM_URL
4. Enter in the UCM URL -> https://<POD_NAME>.fa.<DC>.oraclecloud.com
5. Save and Close

The above query will only return a URL for the attachment. It is the user's responsibility to modify the RTF template to properly display the Image.

The URL returned will look like this: https://<POD_NAME>.fa.<DC>.oraclecloud.com/cs/idcplg?IdcService=GET_FILE&dID=207405

In order to verify the correct image is returned add "_dav" to the URL before "/cs"

So the URL will be: https://<POD_NAME>.fa.<DC>.oraclecloud.com/_dav/cs/idcplg?IdcService=GET_FILE&dID=207405
