Oracle Integration Agentic AI

Convert your Projects to MCP Server

- **MCP-Enabled Projects** – Register integrations as *Agentic AI tools* and enable MCP; each project becomes its own MCP server with a unique URL.
- **Secure & Discoverable** – Only registered tools are visible through MCP, secured with **OAuth** authentication.
- **Integration Requirements** – Must be in an *active project* with a **REST trigger (POST, JSON payload, OAuth)** as the first connection.
- **AI Invocation Made Easy** – Invoke integrations directly from any **MCP client**, enabling seamless collaboration between AI agents and Oracle Integration
- **Available in All Regions**

HQ ERP Project

Edit details

Name
HQ ERP Project

HQ_CreateSupplier

This helps creating supplier in ERP System

Project: HQ ERP Project Integration: HQ_CREATESUPPLIER (01) Identifier: HQ_CREATESUPPLIER

Description and guidelines

The tool description is used by the agent to decide which tool to use for a particular task. The Guidelines are sent as system prompts to provide guardrails for an agent.

Description
This helps creating supplier in ERP System

Guidelines
Use this for creating supplier in ERP system

Parameters configuration

Details around what parameter are asked of the agent, and which parameters need to be set to a predefined value.

Tool

AI Agents and Oracle Integration --- MCP Support

Pattern: Third party MCP Client orchestrates synchronous OIC tools via MCP Server
Automated Contract Risk Analysis- analyze, score, and report on contract risk

AI Agents within Oracle Integration

ReAct Agent Pattern

Currently it supports React Pattern— selecting tools and adapting at each step to reach the goal autonomously.

Fully Customizable

Define behavior with custom prompt templates, tool selection, and integration-backed actions for your business logic. Plus integration generated is customizable

Human-in-the-Loop

Pause execution at critical decision points for human approvals or corrections before continuing the workflow.

Test Agents in Designer

Run and debug agents directly in the OIC design canvas — inspect tool calls and iterate without switching context.

Observability & Monitoring

Full visibility into agent reasoning steps, tool invocations, and execution traces for real-time audit trails.

Global Availability

OIC AI agent capabilities available across all regions where OIC is available, for consistent worldwide deployments.

AI Agents within Oracle Integration

VMware Workload Migration Strategies with Oracle Cloud VMware Solution

#oci #dcx #developer

1st April, 2026 | 11:00 a.m. CEST

VMware Workload Migration Strategies with Oracle Cloud VMware Solution

1st April, 2026 | 11:00 a.m. CEST

In this Developer Coaching session, we will provide an overview of the OCVS architecture, walk through the deployment flow for provisioning an SDDC on OCI, and discuss the transition to VMware's Bring Your Own License (BYOL) model.
